

ANNOUNCING A
NEW PARTNERSHIP:

WELCOME,
SKYBLADE!

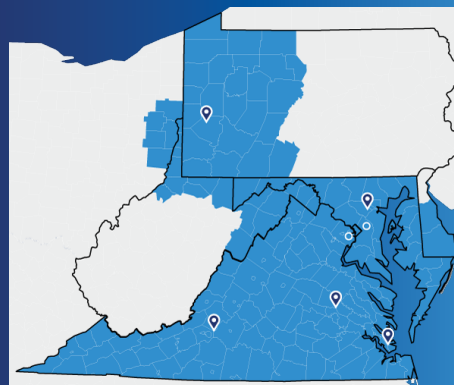

ABOUT SKYBLADE FAN CO.

SkyBlade Fans was established in 2010, with the concept to use large fans to deliver top efficiency to heating and cooling systems. Through extensive research and development, and by utilizing leading-edge Short Take-Off and Landing (STOL) technology, the SkyBlade Fans team developed an airfoil design that moves more air with less energy consumption.

With energy efficiency in mind, SkyBlade Fans reduce the need for heating by redistributing warmer air and reduce or replace the need for air conditioning systems by increasing air velocity and creating an evaporative effect on the skin.

SALES OFFICE AVAILABILITY:

- Baltimore (BAL)
- Washington (WDC)
- Pittsburgh (PIT)
- Richmond (RIC)
- Tidewater (TID)
- Roanoke (ROA)

PRODUCT SOLUTIONS:

Click Products To Learn More 

STOL Series | 10 - 24 ft diameter

The STOL series is perfect for medium to large spaces with a diameter range of 10-24 feet. The gearbox motor makes this budget friendly fan ideal for spaces like warehouses, distribution centers, loading docks, manufacturing, and workshops.

TurboProp Series | 6 - 16 ft diameter

The TurboProp series is perfect for medium to large spaces with a diameter range of 6-16 feet. Featuring a near silent Gearless Direct Drive Motor which provides high output CFM and eight wingtipped airfoils that reduce wind noise and increase efficiency.

MiniProp | 6 - 8 ft diameter

With a smaller diameter range, the quiet direct drive motor makes MiniProp ideal for offices, restaurants, critical environments, and other sound sensitive spaces.

Fantom Series | 10 - 24 ft diameter

With a diameter range of 10-24 feet, the Fantom series is designed for large spaces. The quiet direct drive motor makes it ideal for both commercial and industrial environments like warehouses, distribution centers, loading docks, manufacturing, aviation, and banquet halls.

ShopProp | 6 - 16 ft diameter

The compact size and near-silent direct drive motor makes the ShopProp ideal for offices, restaurants, critical environments and other sound sensitive spaces.

Eppler Series | 10 - 24 ft diameter

Our Eppler series is perfect for medium to large spaces with a diameter range of 10-24 feet. The gearbox motor makes this budget friendly fan ideal for spaces like warehouses, distribution centers, loading docks, manufacturing, and workshops.
